

Continental Employer Profile

Work Abroad Program Model

The **Global Engineering Excellence Initiative (GEE)** and the **Global Engineering Internship Program (GEIP)** are innovative global programs that combine industry, universities, and students to meet the challenges of the 21st century. GEE is a consortium of universities from around the world and Continental AG, which is one of the top automotive suppliers worldwide. The partners work to prepare top engineering students to perform successfully in a global working environment.

The format for the GEE Consortium is to convene an elite group of industry and university representatives from around the world, who are interested, committed and capable of providing world-class engineering education and internship opportunities to develop a globally-competent engineering workforce.

As a result of the GEE Initiative, the **Global Engineering Internship Program (GEIP)** was created. For selected students from the consortium universities, Continental organizes international assignments in the form of a cross-country exchange. The internship positions are located in various countries including Brazil, Germany, Romania and Japan. The GEIP addresses the critical needs of developing an engineering workforce that is prepared to tackle the myriad global challenges of the 21st century Corporation.

Company Profile

With sales exceeding €24 billion in 2008, the Continental Corporation is one of the top automotive suppliers worldwide. As a supplier of brake systems, systems and components for the power train and chassis, instrumentation, infotainment solutions, vehicle electronics, tires and technical customers, the corporation contributes towards enhanced driving safety and protection of the global climate. Continental is also a competent partner in networked automobile communication. The corporation currently employs approximately 133,000 at nearly 190 locations in 35 countries.
